

Exchange Traded Bond units: **Ausnet Services Holdings**

FACT SHEET

XTBs are Australia's first Exchange Traded Bond units. They combine the income and capital stability of corporate bonds with the transparency and liquidity of the ASX market. XTBs trade on ASX just like shares, in \$100 units.

XTB Overview

- Each XTB provides exposure to a specific underlying bond
- Available over a number of ASX200 companies, e.g. Telstra, BHP and Qantas
- ASX quoted, price transparency (6 letter ASX code starting YTM, e.g. YTMAS2)
- 100% of coupons and final principal (\$100) is passed to XTB Holders.

Key benefits

- Access to corporate bond market returns for a broader range of investors
- Transparency of ASX listing and two way prices (subject to liquidity)
- Regular income via underlying bond coupons:
 - Investors can match income to cash flow requirements
- Diversification:
 - Provide capital stability and security in an investment portfolio
 - Make a tactical asset allocation to the Australian corporate bond market
- Opportunity for a higher rate of return than TDs or other cash based products.
(Term deposits may enjoy the benefit of protection under the Financial Claims Scheme).

Key risks

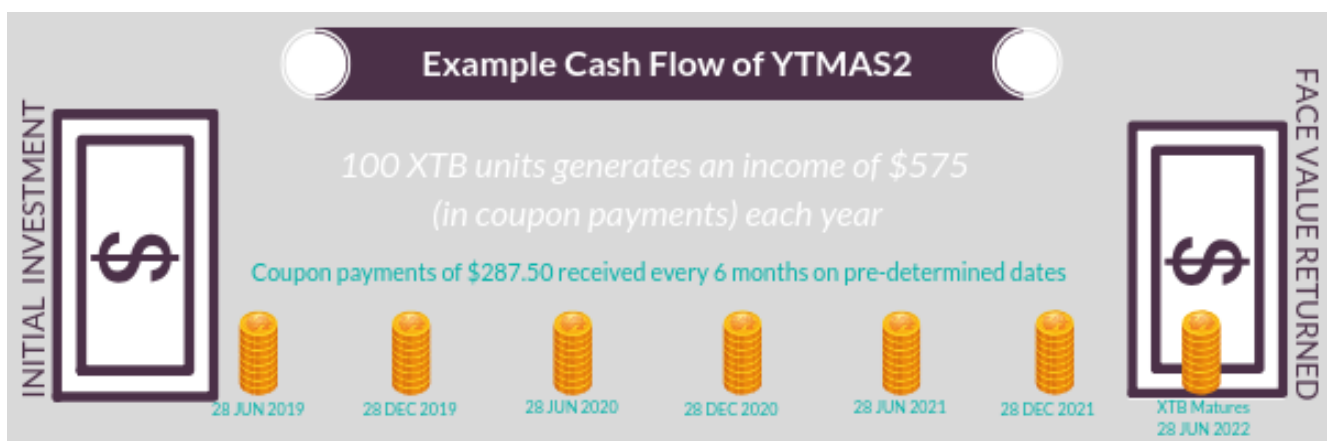

As with all investments, there are risks you should be aware of before making an investment decision. These include:

- Credit worthiness of the underlying corporate bond
- Liquidity risk
- Concentration risk
- Market risk
- Trust risk.
